

Smar<mark>tScan Barcode Translator Demo</mark>

Add the power of barcoding to QuickBooks

An overview of using SmartScan Barcode Translator with QuickBooks

www.baus-systems.com/smartscan.html john.palios@baus-systems.com (206) 932-9986

This is the main screen of Barcode Translator. It shows which QuickBooks version is in use and what the cursor will do before and after each – scan (the scan return pattern).

Barcode Translator must be open to operate the scanner and it will hide in the background when scanning into QuickBooks transactions.

In this case we have created a custom scan pattern we named "Invoice" to tab first, enter the item scanned, then tab 4 more times to leave the cursor in the next quantity field. This enables continual scanning of items.

₩	🖁 SmartScan Translator										
Eile	e S <u>e</u> ttings <u>D</u> ata	Help									
Г ⁽	Current Settings-										
	Accounting Syste	IS 🔰									
	Scanner Return Pattern:										
	<tab><retval><tab><tab><tab><tab></tab></tab></tab></tab></retval></tab>										
	Scanner Return Pattern Mode:										
	Invoice		_								
	<u>S</u> top	Hide	E <u>x</u> it								

Connecting to QuickBooks is easy. Just browse to the open company file and choose the custom field created in your item list for the bar code.

	Memo	Select PO Receive All Show	PO	

Barcode Translator makes its own "Translation Table" pairing the assigned bar code number with each corresponding item in QuickBooks. This is what facilitates the translation process.

Ħ	SmartScan Translatio	n Table Data

		Delete ALL	Cl <u>o</u> se Total Reco	ords: 11

Barcodes may be entered into Quickbooks by using an existing barcode or creating your own barcode and scanning/entering it into an "item" <u>custom field</u> in QuickBooks. To **expedite bar code entry, use the free "Custom Field Manager"** described in the next slide.

SmartScan **Custom Field Manager** is a **free program** that gives an interactive spreadsheet view of the QuickBooks Item List to **expedite bar code entry**. Bar codes can be scanned or entered manually. Custom field changes can be saved and updated in QuickBooks all at once.
