*SmartScan **Label Link 3**
automates the transfer of data
from **QuickBooks**
to **BarTender** label printing
software.*

SmartScan Label Link 3 is a communication link between **QuickBooks** and **BarTender** software. The user may select any amount of items from inventory, purchase orders and/or invoices in QuickBooks to create labels. **SmartScan Label Link** passes data from **QuickBooks** to **BarTender** allowing you to design and print barcode labels.

Add sales items from
QuickBooks to Label
Link

... Purchase Orders

This option is great for labeling incoming inventory as it's received! This will make sure all items in stock will be barcoded.

**Make just one print
run for all your
labels!**

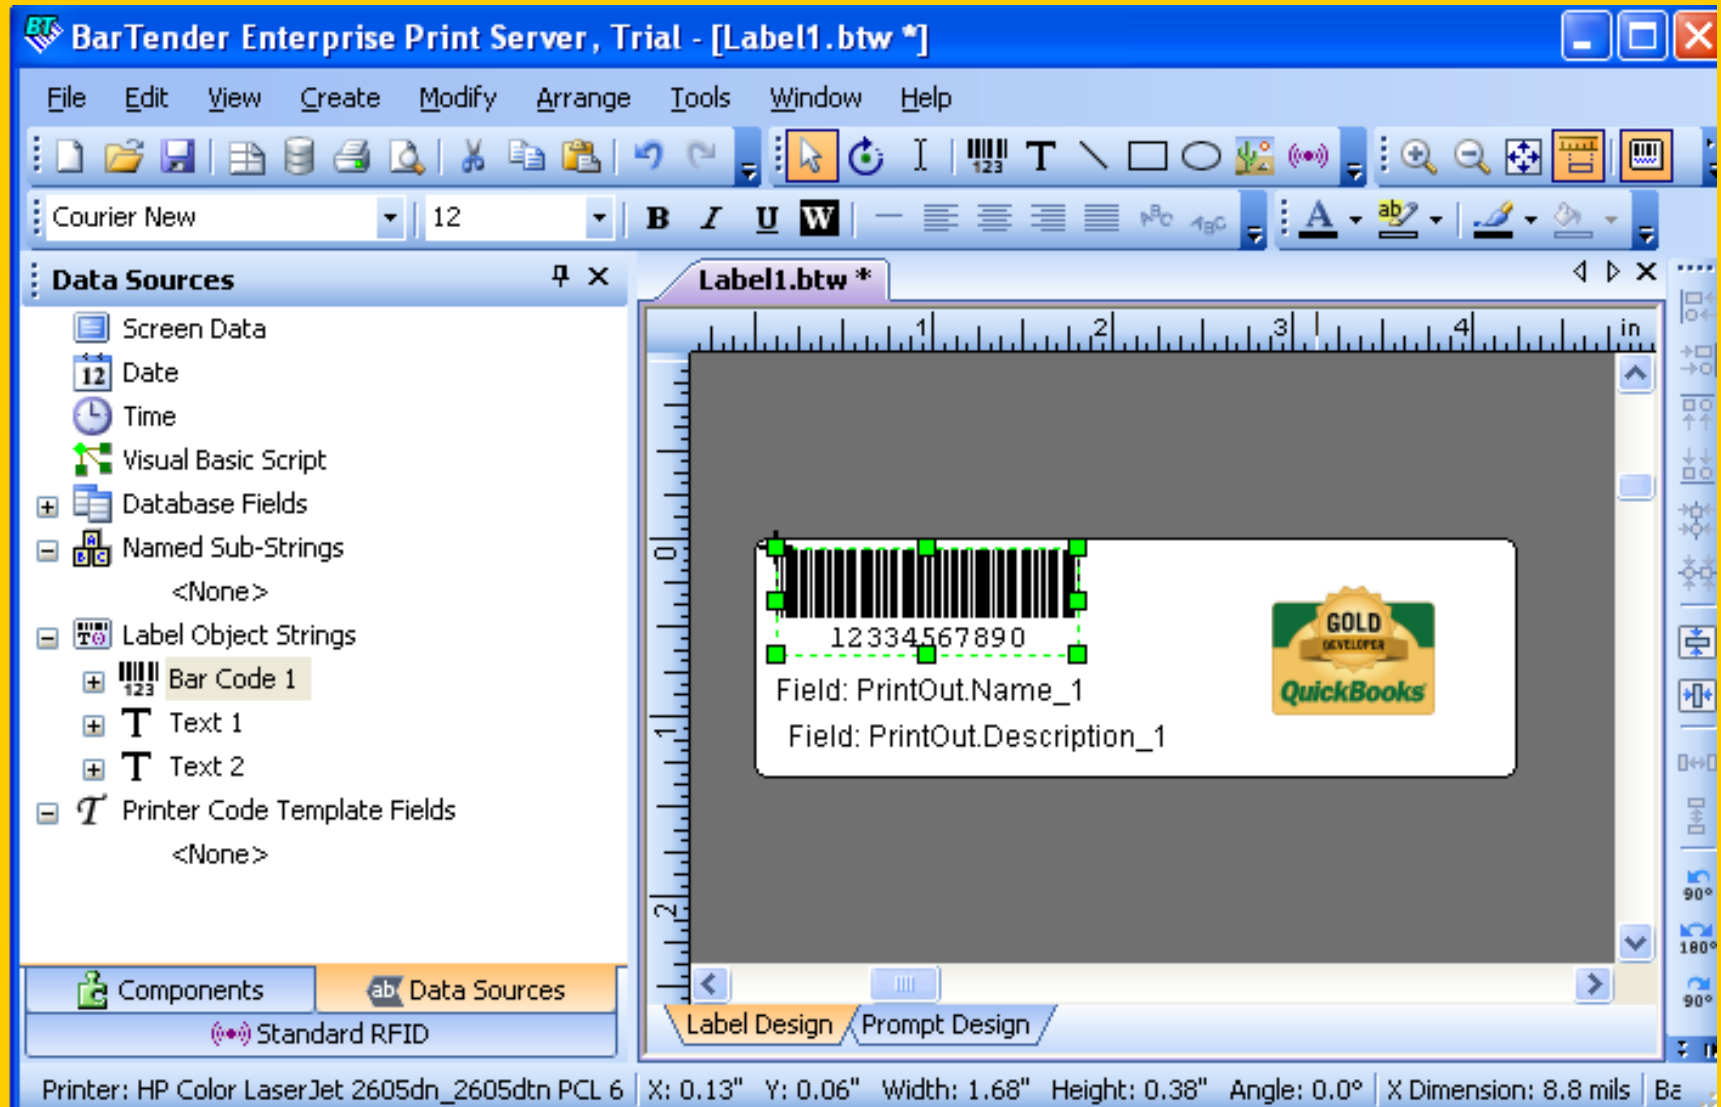

Now that the items are selected, you can click the “Preview” button to open BarTender.

Opens BarTender

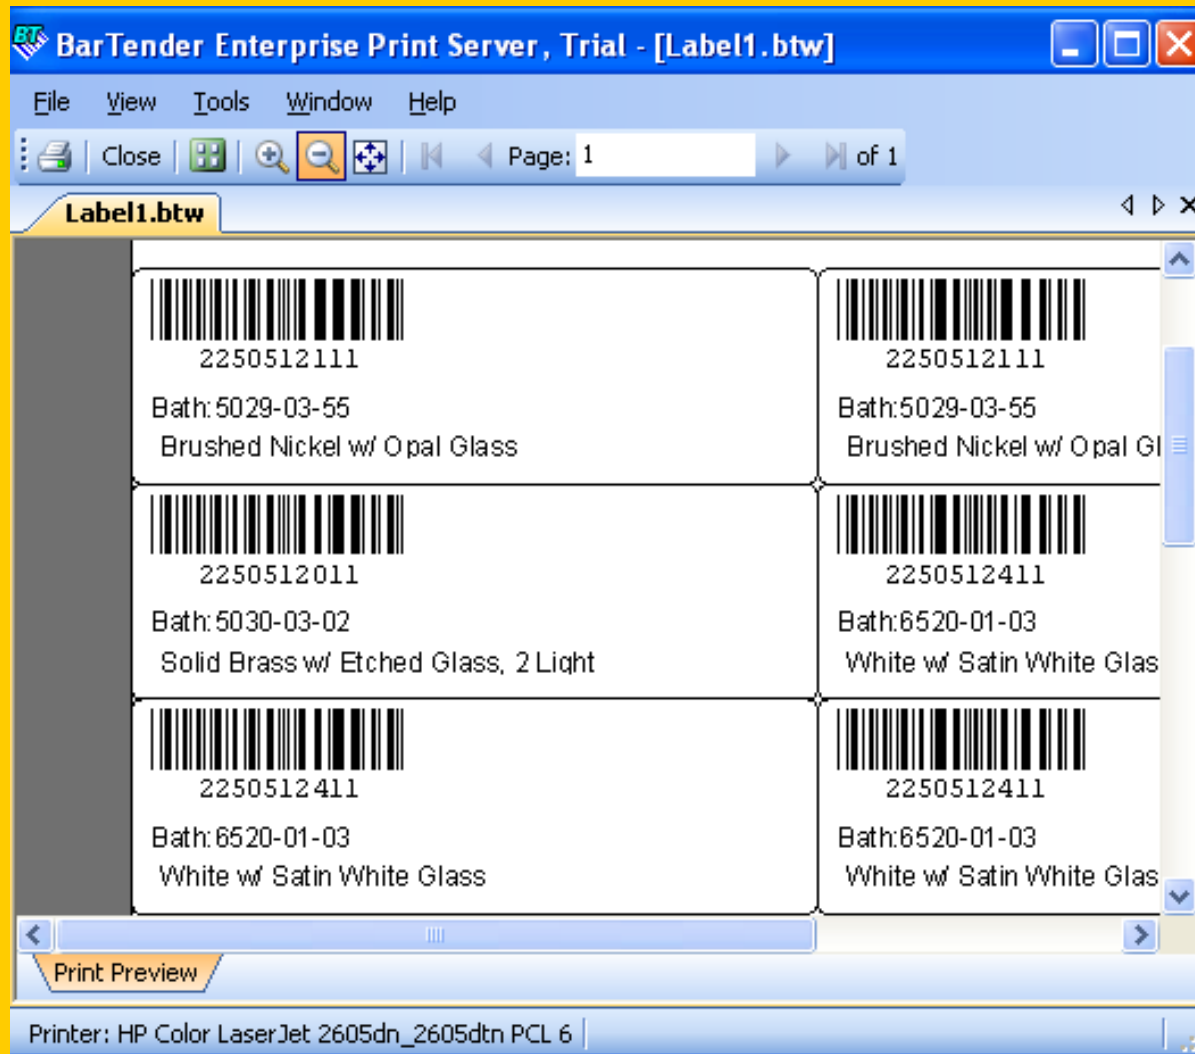

**Design and Print
Labels**

The BarTender template main screen opens and the data fields can be modified or rearranged.

Print Preview will show what the barcoded inventory item labels will look like! Now you're ready to print.
(BarTender is in trial mode for this demo.)

Labels may be printed on a standard laser printer.

Companies that will be printing larger quantities of labels or have special requirements should consider a thermal printer.
